As per our agreement in Kansas City, attached are electronic files requested by Nebraska, which have not been provided previously.

In its letter of March 21, 2008, Nebraska also requested that Kansas address issues and concerns raised by Nebraska in Tabs 2a and 2b from the notebook Nebraska provided at the RRCA meeting. Many elements of our response will have to await our meeting of April 11, esp. in light of revisions to Nebraska's analysis received on Wednesday, April 2 and other questions and missing data that still must be provided. I would note that on my return to this office this afternoon, I found the notebook of additional data provided by Nebraska which may include some of the information we require.

I am working on a letter providing what response we can at this point to Nebraska request and hope to provide it on Monday.
